

Security Developer

A **Security Developer** is a professional who focuses on designing, implementing, and maintaining secure software and systems to protect against cyber threats. They integrate security measures such as **encryption, authentication, and secure coding practices** into applications and conduct **penetration testing, vulnerability assessments, and threat analysis**.

1. Security Expertise and Risk Assessment

2. Automation and Tool Proficiency

- Jenkins: <https://www.youtube.com/watch?v=FX322RVNGj4>

- Ansible Full Course : <https://www.youtube.com/watch?v=wgQ3rH0YqEM>

- Kubernetes: <https://www.youtube.com/watch?v=X48VuDVv0do>

- Python: <https://www.youtube.com/watch?v=rfscVS0vtbw>

- Bash Scripting: <https://www.youtube.com/watch?v=ZtqBQ68cfJc>

3. Continuous Integration/Continuous Deployment (CI/CD)

- CI/CD Pipeline Tutorial: <https://www.youtube.com/watch?v=scEDHsr3APg>

4. Cloud Security and Infrastructure Management

- AWS Security: <https://www.youtube.com/watch?v=ulprqHHWIng>

- Azure Security: <https://www.youtube.com/watch?v=2nZw-4Q1xPw>

- Google Cloud Security: <https://www.youtube.com/watch?v=jpno8FSqpc8>

5. Containerization and Orchestration

Familiarity with containerization technologies like Docker and orchestration tools like Kubernetes is essential for managing and securing containerized applications.

- Docker for Beginners: <https://www.youtube.com/watch?v=3c-iBn73dDE>

- Kubernetes Tutorial for Beginners: <https://www.youtube.com/watch?v=X48VuDVv0do>

6. Collaboration and Communication

Effective Communication Skills: <https://www.youtube.com/watch?v=HAnw168huqA>

Developing these skills will provide a solid foundation for a successful career as a Security Developer in the SecDevOps field.
