

MERN STACK DEVELOPER

MERN Stack Developers handle both **frontend and backend development**, using **JavaScript/TypeScript** throughout the stack. They specialize in building **dynamic, scalable, and high-performance web applications**, ensuring smooth interaction between the user interface, backend server, and database.

Specialises in building web applications using technologies which are mentioned below. MongoDB, Express.js, React.js, and Node.js.

❖ Frontend Skills

1. React.js:

<https://www.simplilearn.com/learn-basics-of-reactjs-components-free-course-skillup?tag=react%20js>

2. JSX (JavaScript XML): Writing HTML-like syntax within JavaScript.

3. Routing: Knowledge of React Router for handling navigation between pages or views in a single-page application (SPA).

4. CSS frameworks (e.g., Bootstrap, Material-UI)

❖ Backend Skills

1. Node.js:
